**Saturday October 22, 2016, 09:00 am - 05:00 pm and
Sunday October 23, 2016, 09:00 am - 02:00 pm**

Course Topics:

Dissection of Anatomical Danger Zones:

- lingual + inf. alveolar + mental + infraorbital nerve
- palatine + facial + submental artery

Bone Harvesting Techniques:

chin + ramus + tuberosity

Augmentation Techniques:

horizontal and vertical onlay grafts, GBR

Maxillary Sinus Elevation Techniques:

- minimal invasive – conventional

Soft Tissue Management:

- tension free closure
- connective tissue graft
- dental papilla reconstruction
- suture techniques

Implant Insertion Techniques:

- immediate
- aesthetic zone
- posterior zone

Closure of a Mouth Antrum Communication:

- periosteal slitting flap
- palatal island flap
- Bichat fat pad flap

07.30 pm on Saturday: Course dinner at typical Vienna "Heurigen" Restaurant

In between coffee break and lunch

Course Description:

80 % of the course are hands-on with 20% lectures about explanations of techniques. A maximum of 2 participants will be assigned to each cadaver skull. For the cadavers are fresh and not embalmed a nearly "close to reality" simulation of the surgical procedures can be experienced.

Course Target:

The participants will have the opportunity to "update" the entire oral anatomy by riskless exploration of fresh and not embalmed human cadaver skulls. By performing the implant preparing surgical procedures and implantations the participants will learn feasibility but also the limits are demonstrated. By focussing on risks and complications of such operations and their management the patient's safety should be increased.

Course language: English

A certificate will be provided by the Vienna Human Cadaver Dissection Course upon completion of the seminar.

Speakers

**OA Dr. Norbert Fock,
MD, DDS**
Specialist in Cranio- and
Maxillofacial Surgery
[www.anatomical-
surgical-training.com](http://www.anatomical-surgical-training.com)

**Univ. Ass. Prof.
Dr. Hannes Traxler**
Anatomist, medical
practitioner
Medical University Vienna
